

# FOR SALE

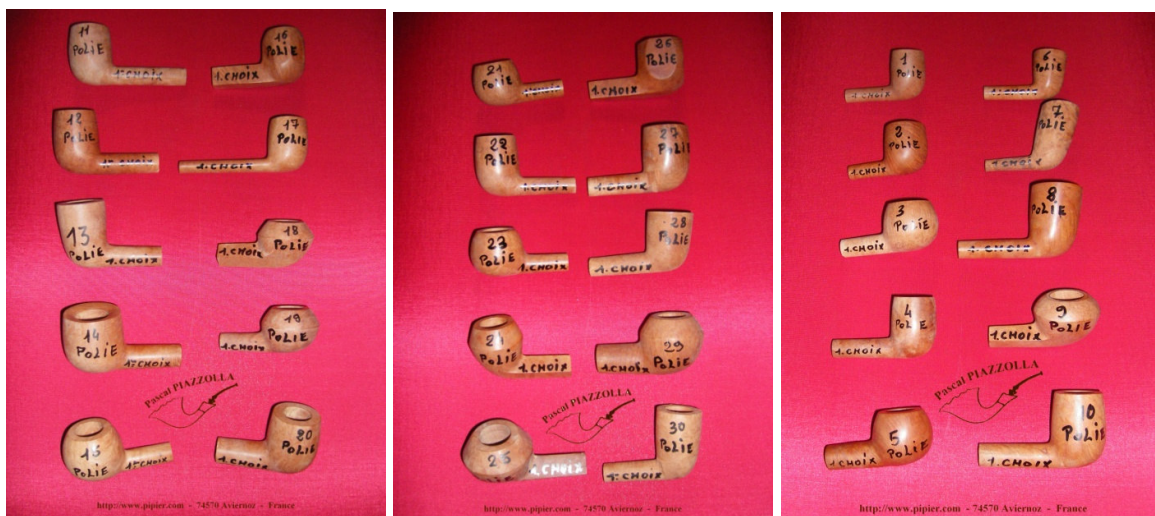

## The Pipes.

Today, after a long career as a master carver and pipe maker, Pascal Piazzolla aspires to enjoy his retirement, and he wants you to enjoy the treasures he has accumulated. A vast stock of pipe heads, raw and polished, medium and large, and also lots of finished pipes, natural or coloured. All are at least thirty years of age and demonstrate the skill of a master craftsman. You may also be interested in the large stock of pipes in ebony and horn; curved or straight and with a range of sizes available.

The opportunity is also available to purchase the tools of this trade: a selection of machines all lovingly used and maintained by the master craftsman, as well as the raw materials needed to continue the art.

Conditions are negotiable – please do not be afraid to ask!

Series of pipe heads (medium, polished): 30€ per dozen, discounts available by quantity.

Medium pipes, premier quality, natural colouration: 144€ per dozen

Medium pipes, coffee colour: 120€ per dozen

For the connoisseur, the opportunity is also available to watch the process in action: mounting, turning, joining, milling and polishing – to watch the craft is almost as enjoyable as the finished product!

All pipes can be signed by Monsieur Piazzolla if desired.

### **The Craftsman.**

**Pascal Piazzolla**, cousin of “the king of Argentinian Tango” Astor Piazzolla, is a master pipe maker, awarded several times for his **high quality craftsmanship**.

He made his debut with Chapuis Comoy Institutions (Society La Bruyere) in Saint Claude le Jura (France). Then, as a designer, he worked for a number of famous institutions such as Choquin, Butz, Waille, Grapple, Jeantet David, Bontemps, etc.

He contributed to the development of the commercial establishment of Jean Lacroix, working from 1967 to 1978 as a representative. Passionate about his craft, he moved to the Annecy area (Aviernoz) to develop his own style and range of pipes.

With his pipes being smoked around the world and his work recognised by his peers and admirers alike, he continues to make pipes of the highest quality as his passion.
